

Managers Intelligence

You, Your Team and AI

Join our Managers Intelligence two-day fire chat & change modelling masterclass this winter.

It is designed for high-performing managers to have energized conversations and learn new outcome-coaching, friction management and change intelligence modeling using human & artificial intelligence.

Perfect choice for:

- People Managers & Directors
- Project & Product Managers
- Business & Technical Leads

When was the last time your managers had a conversation about being a manager?

96% of the organizations we've worked with have said never. That's why our Firechat becomes a powerful space for discovery, recognition, and expression. Voted most valuable program by participants.

"We needed this to challenge assumptions, uncover the truth, and move forward as one united force." – Apple UX Senior Lead

87% | MVP

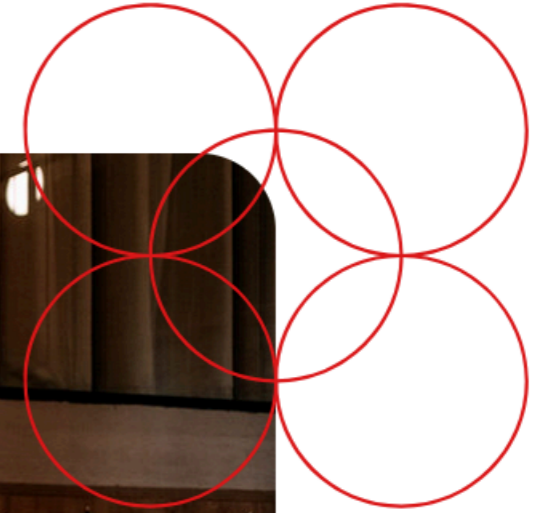

Managers learn how to develop interaction models like AI.

The skills design part of the program focuses on developing models to manage people, change and outcomes. These interaction models can be inputs when designing your organization's AI models. "Greatest of all time" can be achieved with skills, practice and determination - we know your teams can strive to be just that with human and artificial intelligence.

82% | G.O.A.T.

Day 1 : Managers get to discover, recognize, and express their minds as a team.

Day 2

Interaction model design focused on:

- **Outcomes Coaching with your Team.**
- **Stirring the Bowl (Friction Management)**
- **Change Intelligence Modeling with AI.**

Driving impactful change— one manager at a time
